SULPHUR POWDER

SULPHUR POWDER, ALSO KNOWN AS AGRICULTURAL SULPHUR IS AN EXCELLENT ACIDIFYING AGENT FOR LOWERING THE pH OF ALKALINE SOILS.

THIS IS VERY IMPORTANT FOR PLANTS THAT REQUIRE ACIDIC CONDITIONS SUCH AS AZALEAS, CAMELLIAS, GARDENIAS, RHODODENDRONS, ERICAS, HYDRANGEAS, PHILODENDRONS & OTHER ACID LOVING PLANTS.

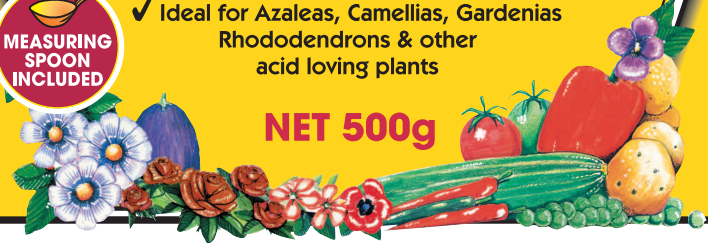

DEFICIENCIES

Deficiencies of Sulphur result in restricted growth and yellow leaves.

- ✓ Lowers pH of alkaline soils
- ✓ Ideal for Azaleas, Camellias, Gardenias Rhododendrons & other acid loving plants

NET 500g

DIRECTIONS FOR USE

1 HEAPED  TEASPOON = 3g

EASY GUIDE CHART

The following chart is a guide to lower soil pH by 1 pH value (ie. from pH 7 to pH 6)

SOIL TYPE	APPLICATION TO EACH SQUARE METRE
Sandy Soil	25 - 50g (8 - 16 )
Loam Soil	50 - 80g (16 - 26 )
Clay Soil	80 - 120g (26 - 40 )

Work Sulphur powder into the soil and water well. Avoid contact between sulphur powder and plant foliage.

SULPHUR POWDER ANALYSIS

99.9% Sulphur (S) as Elemental Form
